The first of these is the  
fact that the number of  
species of plants and animals  
which are found in the  
tropics is much greater  
than in the temperate  
regions. This is true of  
both the flora and the  
fauna. The reason for  
this is not yet known,  
but it is probably due  
to the fact that the  
tropics have been more  
recently glaciated than  
the temperate regions.

1. The first part of the paper is devoted to a general  
discussion of the principles of the theory of  
the structure of the universe. It is shown that  
the universe is a system of particles, which  
are in motion, and that the motion is  
governed by the laws of mechanics. The  
principles of the theory are then applied to  
the case of a system of particles, which are  
in motion, and the results are compared with  
the observations of the universe.
